## About

---

I am a Flutter Developer with experience in building intuitive, high-performing mobile applications for Android and iOS. I specialize in writing clean, efficient Flutter and Dart code and enjoy solving challenges to improve user experience. Additionally, I have backend experience with Django, building APIs and managing databases. I am dedicated to continuous learning and growth.

## Skills

---

### Technical Skills

- Flutter, Firebase, Django, NextJs, MySql

### Soft Skills

- Adaptability, Teamwork and Collaboration, Problem-Solving

## Experience

---

### CodeCraft AI Solutions

Ernakulam

Flutter Developer

May 2024 - September 2024

- Developed and optimized cross-platform mobile apps using Flutter and Dart, implementing MVVM architecture and Provider for state management to ensure a smooth user experience on both Android and iOS.
- Collaborated with backend developers to integrate REST APIs, enhancing app functionality, while contributing to UI/UX design to meet technical and user experience requirements.

### Neuflo

Ernakulam

Flutter Developer

December 2023 - May 2024

- Developed and maintained cross-platform mobile applications using Flutter, with a focus on responsive user experiences, efficient state management via Provider, and seamless integration of Firebase for real-time database management and push notifications.
- Collaborated with designers and backend developers to deliver high-quality app features, contributing to the planning and execution of new features that aligned with project goals and user needs.

## Projects

---

### Traez

A comprehensive logistic app where clients can track the delivery person in real-time

- Real-time location tracking of delivery personnel.

- Real-time location tracking of delivery personnel.
- Integration of Mapbox for cost-effective mapping solutions.
- MVVM architecture with Provider for state management.
- Role-based interfaces for different user types.

### **Marina Aqua**

An innovative app designed to streamline the process of ordering and delivering drinking water to urban areas.

- Allows users to easily schedule and order drinking water deliveries with just a few taps, ensuring convenience and accessibility.
- Features a straightforward and intuitive interface that simplifies the ordering process for users
- MVVM architecture with Provider for state management.
- Utilizes Firebase Cloud Messaging (FCM) for real-time notifications and updates

### **SkillVault**

A job portal website that allows companies to post job openings and users to take exams to showcase their expertise.

- Allows companies to post job openings.
- Users can attend exams with video monitoring, structured in 7 levels (5 questions per level).
- Users must answer at least 3 questions correctly to advance to the next level.
- Provides feedback on incorrect answers with the help of Together AI.
- Companies can easily review user profiles.
- **Technology Used :** React, MongoDB, FastApi, TogetherAI, Langchain

## **Education**

---

### **Bachelor of Technology**

Computer Science And Engineering

St.Joseph's College of Engineering And Technology, Palai

### **Higher Secondary**

St.Sebastian's Higher Secondary School , Nedumkandam

## **Certifications**

---

- **Flutter** : A Beginners Course provided by Infosys Wingspan
- **Python** : provided by Coursera

## **Achievements**

---

### **Yip 4.0 District Level winner**

Young Innovators Programme (YIP) A flagship program as part of the innovation segment that aims to empower future innovators to innovate new products, services

### **RPA Hackathon Winner**

Developed a winning project for the UiPath Community hackathon that automated bulk email notifications for warranty expiry
